about me

A dedicated JavaScript Developer with 2+ years of experience in web and mobile app development using React, React Native, and Next.js. Skilled in TypeScript, Node.js, and NoSQL databases, delivering dynamic user experiences and automation. Previously worked as a Data Entry Specialist, honing attention to detail and efficiency in data management.

work experience

Dream Star Group LLC

typist & data entry

I worked as a Typist in my early career, focusing on fast and accurate typing. I transcribed documents, entered data efficiently, and maintained records with attention to detail. This role helped me improve my typing speed, accuracy, and proficiency with various text-processing tools.

LaymanMax

frontend developer | Feb 2024 - July 2024

I worked as a Frontend developer at LaymanMax, a gaming events company, constantly learning new technologies. I wrote Firebase Cloud Functions in Node.js to manage tournament matches and handle giveaways for players. I also used the latest tech stacks, including Next.js and shadcn/ui, to build SEO-friendly pages.

Jess Smith Insurance Agency

data entry specialist

I worked as a Data Entry Clerk in my early career, gaining experience in handling and organizing data. I entered, verified, and maintained records with accuracy, ensuring data integrity. This role helped me develop attention to detail and efficiency in managing large datasets.
